

Yeremia Reynaldo

yreynaldo932@gmail.com | LinkedIn

Experienced IT professional with a strong background in managing large-scale Apple environments, automating device onboarding and maintenance, and supporting secure, reliable systems. Skilled in scripting, endpoint management tools, identity integration, and team collaboration. I focus on reducing manual overhead, improving user experience, and building processes that scale.

Key Skills

Bash/Shell Scripting | Power Automate | Power BI
Mac Fleet Management (Jamf, Mosyle)
Endpoint Security & Compliance | Certificate-Based Auth
System Monitoring & Reporting | Zero-Touch Deployment
Automation Workflows | Onboarding/Offboarding at Scale
Documentation (Confluence) | Incident Response Support
Identity & Access Management (Jamf Connect, AD Domains)
Vendor Collaboration | Cross-Platform Support (macOS, Windows)

Work Experience

Senior Mac Engineer — CVS Health

Feb 2023 – Present

Senior Mac Engineer with extensive experience managing enterprise scale Apple environments and cross platform endpoints. Responsible for 10,000+ macOS devices at CVS Health, ensuring security, compliance, and performance across multiple Active Directory domains. Skilled in endpoint automation, incident response, and vendor collaboration to deliver reliable IT services at scale.

- Manage enterprise Mac fleet with Jamf Pro, automating software updates, patching, and compliance monitoring.
- Deploy and support Jamf Connect for identity authentication across domains.
- Develop automation solutions using Bash, Python, and Power Automate to reduce manual overhead.
- Script dynamic solutions for admin rights management, reducing IT service tickets.
- Partner with Apple, Microsoft, and Jamf on change deployments and integrations with minimal disruption.
- Support incident and root-cause analysis as part of on-call rotations for P1/P2 issues.
- Document processes and mentor IT support staff to ensure consistency and knowledge transfer.

IT & Ops Support Analyst — Spencer Thomas Group

Aug 2022 – Feb 2023

- Automated Mac device enrollment using Mosyle, reducing manual work significantly.
- Built self-service tools for employees to manage approved software.
- Managed SonicWall firewalls and implemented BitDefender antivirus.
- Helped launch Windows 365 virtual desktops and documented key workflows.

IT Support Specialist — Compass

Feb 2022 – Aug 2022

- Provided technical support for 750+ users across offices and remote locations.
- Built internal dashboards to track IT KPIs.
- Led inventory and office setup projects including video conferencing and VOIP.
- Supported Mac devices with Jamf and Windows systems via Datto RMM.

IT Support / Secure Workstation — Right Networks

Dec 2019 – Oct 2021

- Deployed antivirus and backup solutions for endpoint security.
- Participated in response to potential security incidents.
- Used PowerShell and Confluence for system checks and documentation.
- Trained support staff on procedures and troubleshooting.

Projects

- **Self-Healing Patch Automation:** Built automated remediation system using Jamf and Installinator to detect and re-install broken or outdated applications. Reduced failure related tickets and improved patch reliability across 10k devices.
- **Compliance Dashboard Cleanup:** Built a Power BI dashboard to surface unused scripts, packages, and smart groups in Jamf to reduce clutter and prevent system issues like 503 errors. Unused assets are saved to OneDrive for record keeping before being removed automatically.
- **Admin Rights Automation:** Scripted solution to grant/revoke Mac admin rights dynamically, reducing manual IT requests.
